

## Future Proof Your Home

### The Challenge of Rising Energy Costs

The impact of huge energy price increases on home owners and landlords is being felt all around the UK. Although there is some talk about price caps the reality that most people are seeing their bills rocket to unprecedented levels – leaving them a lot poorer. The impact of this situation threatens prosperity, mental health, well-being and in the 21<sup>st</sup> Century it just seems plain wrong!!

### The Renewable Energy Independence (REIP) Solution

The **Renewable Energy Independence Programme (REIP)** has been established as a solution based pathway to help as many UK homeowners as possible to tackle the problem and take swift action. One cost effective solution you can benefit from is installing money saving renewable energy systems such as **Energy Storage Batteries** that enable you to utilise off-peak low cost energy storage at night – and then used that low cost stored during the day instead of high cost grid energy.

The beauty of Energy Storage Batteries is that installation through our certified electrical contractor network is quick and easy, making you cash positive from day one. They can be installed in most residential properties including flats and apartments.

Through the REIP initiative there is also a flexible payment option so that you can spread the cost and enjoy the benefit of overcoming existing and future high energy costs.

### Bonus

As a bonus, through the Renewable Energy Independence Programme (REIP) home owners will also be gifted an **Infrared Heating Panel** (worth £400) in the form of an artwork canvas that simply plugs in to warm a room for a fraction of the cost of radiators or other conventional heating appliances.

Flexible funding facilities are in place to make this Energy Battery Storage system transition easier than ever and provide cost savings and benefits from day one.

### Next Steps

If you are looking to **“Future Proof Your Business”** and become more Off-Grid dependent you need to take action now and have your questions answered. In the first instance please call Graham now for a no obligation chat on 07870 222771.
